## Barnstead

Product Group: **Deionization**  
 Product Category: **E-Pure™**  
 Model Number: **D4631**

- 1/4 turn quick release canisters
- High flow rates
- Lowest operating cost of any system on the market
- Larger cartridges mean increased cartridge life and increased system flow rate

### Product Description

- Resistivities up to 18.2 megohm-cm and TOC levels below 10 ppb.
- Virgin polypropylene water pathways prevent recontamination.
- Recirculation pump continuously recirculates water throughout the entire system to maintain water purity and reduce the quantity of waste water required for rinse-up.
- Wall mounted; completely assembled for easy installation.
- 0.2 micron absolute final filter removes bacteria and particulates that could alter your results.
- Digital resistivity meter is automatically temperature compensated to 25°C, preventing fluctuating resistivity readings due to temperature changes.
- Flow rate up to two liters per/min.
- High capacity cartridges provide low operating cost.

Desc	E-pure 3-holder
Electrical	120 VAC
Hertz	50/60
Inlet Conn I	1/4 NPT
Inlet Temp FC	40°-120°F
Maximum Flow Rates L Min	2.0 LPM
Maximum Inlet Pressure psig	100
Overall Dimensions D	7.5 (19.1)
Overall Dimensions H	28 (71.1)
Overall Dimensions W	29 (73.7)
